

# SHAUNA NOYES ARCHITECT INC.

AIBC, MRAIC, LEED AP

## RECENT WORK

Based near Kamloops, BC since 2007, Shauna's focus is to provide a high quality, personalized service that is fully engaged with the client and their desired outcomes. She pursues excellence in Architecture and Sustainability with local communities and works with clients to achieve their goals within this context. Shauna has extensive experience as Project Architect and LEED AP.

Shauna specializes in green building design of all types, has facilitated several Integrated Design Processes with multi-disciplinary project teams and coordinated & certified LEED™ green building projects.

She has over 37 years of combined education and experience working on a range of notable new building projects across Canada, and in the United Kingdom & Germany, including a significant amount of work on municipal infrastructure and facilities. She wishes to continue to achieve a high level of green building design and embraces exceptional and unique opportunities that will develop beautiful, holistic and sustainable projects that enrich culture, communities and the environment.
